100% HEAT-TREATED BALL

Fits FURUKAWA® DCR 20

425 P/N 3434

Tooth-Tooth E083402050240

BALL-BEARING DESIGN

WHY CUSTOMERS PREFER OUR JAWS

Performance and jaw life come from what is inside the jaw.

FACTORY-STYLE JAW

One material throughout. It can only be case hardened.

Case hardening creates a thin hard shell, similar to the hard candy shell on an M&M®.

Once the case wears through, the material underneath is soft and the jaw can wear quickly.

OUR BALL BEARING WELDED JAWS

Two materials: a softer holder with balls that are heat treated 100% through.

The ball retains its hardness from the first piece of pipe to the 100th - until it is fully worn into the base material.
